

Heat Loss Replacement

nVent NUHEAT electric radiant heating systems are ideal for heat loss replacement applications. NUHEAT systems offer a silent, invisible alternative to baseboards, under-slab systems or systems that install within or below the sub-floor. NUHEAT systems are also ideal for retro-fit applications because they install directly below the floor coverings.

BENEFITS OF HEAT LOSS REPLACEMENT WITH NUHEAT INCLUDE:

Perimeter Heat with nVent NUHEAT

Perimeter Heating

NUHEAT systems are ideal for heat loss replacement around curtain walls. This ensures more heat is retained in the room and keeps floor-to-ceiling windows free of condensation.

Alternative to sub-floor or under-slab heat replacement

NUHEAT systems install quickly and easily, directly below floor coverings. This is a simpler and more cost effective alternative to under-slab systems or systems that install within or below the sub-floor.

No circulation of contaminants

Unlike forced air systems, NUHEAT systems do not circulate dust, germs, allergens, or other airborne contaminants.

Replace baseboard heaters

Don't allow unsightly baseboard heaters to clutter up your views and take up valuable living space. NUHEAT systems result in a clean look while providing more heat output and improved efficiency.

Silent & invisible

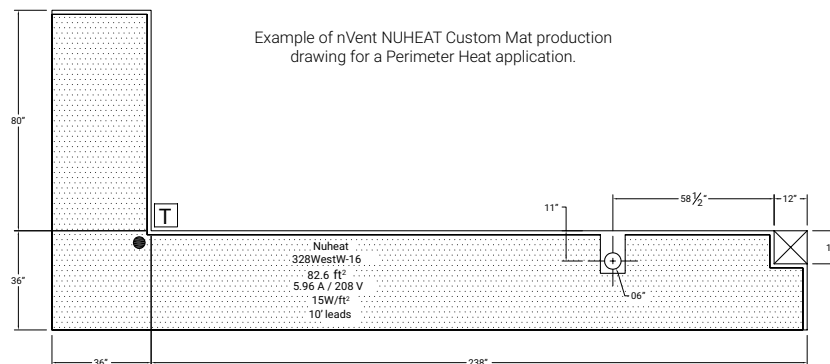

NUHEAT Mats are installed beneath the finished floor, offering a silent and invisible solution.

Maintenance-free

NUHEAT systems do not require ductwork, boilers, valves, or any other additional equipment. NUHEAT Mats are covered by a 25-year warranty and require zero maintenance.

Perimeter Heat with Baseboards
